

RestrictView Laminated Glass

Product Description

RestrictView glass is designed to prevent viewing through two pieces of glass while it permits viewing through one piece. This means, for example, that in a hospital, patients can see nurses or attendants in the corridor through windows in their rooms, and the nurses can see the patients. Patients, however, cannot see across the corridor into the room of another patient. In a courtyard application, people can see into the courtyard, but cannot see through to viewers on the other side. Adjoining treatment rooms or conference rooms are only viewable from corridors.

RestrictView glass is a laminate and can be manufactured in a variety of formats, including approved attack specification formats for psychiatric hospitals and prisons.

Product Specifications

Make-up:	8.76 mm (3/16") make-up comprising: <ul style="list-style-type: none">■ 4-mm SCHOTT AMIRAN® anti-reflective glass■ 0.76-mm polyurethane with RV interlayer■ 4-mm SCHOTT AMIRAN® anti-reflective glass
Average thickness:	8.76 mm (3/16")
Weight:	4.68 lbs/ft ²
Maximum dimensions:	44" x 44"
Applications:	<ul style="list-style-type: none">■ Corridors■ Hospitals■ Prisons■ Courtyards■ Conference rooms■ Wherever restricted vision into adjoining glass-enclosed spaces is desired
