

SpectraFlex[®] harnesses

Finest quality end emitting glass fiber optic harnesses

- Excellent color characteristics & transmission
- Electrically safe
- Multi-fiber construction provides flexibility
- Unrivalled longevity
- High quality SCHOTT glass fibers
- Factory terminated common end to ensure quality and performance

ORDERING INFORMATION

Subject to certain guidelines we can produce harnesses to your requirements. A harness can contain different flex sizes and tail lengths. Within a harness, lengths can be specified in 100 mm steps up to 20m.

Mixed tails (ie SpectraFlex, SpectraStream, SpectraLine, etc) of different sizes can be included in a harness. Special harnesses are available upon request.

When ordering please note the maximum number of tails possible in a harness and the maximum tail length.

Note: tolerances apply to the tail length of harnesses. Please contact us for details.

The transmission of light versus tail length.

Absorption of light per meter of fiber versus wavelength.
