

Transmitted light stage, P/N 122 150

Analyzer

Transmitted light stage P/N 122 150 with  
Polarization filter P/N 158 500

## Transmitted Light Stage

- Transmitted light stage for microscopy applications.
- Cost effective transmitted brightfield illumination.
- Can be directly inserted into the microscope stages of most major microscope manufacturers.
- Small height raises approximately 20 mm above microscope stage.
- Evenly illuminates a diameter of 50 mm.
- Can be used with all flexible light guides with bundle diameters up to 5.0 mm.
- Polarizing filters available (see table below).
- Manufactured in the EU.

	Part No.	Dimension	Suitable SCHOTT light guides
<b>Transmitted light stage</b>			
For KL 200, KL 200 LED	122 150	Ø 84 mm	121 101
KL 1500*			171 101
KL 2500 LCD			155 100
			155 101
		155 102	
<b>Polarizing filter for transmitted light stage</b>			
Polarization filter	158 500	Turnable polarization filter attachment	
Analyzer	158 505	M49 x 0.75	
Analyzer	158 510	M52 x 1.0	
Other analyzers available from microscope optic vendors			

\* LCD, compact, LED

Product improvements may result in specification or feature changes without notice.
