

Spherical & Achromatic Lenses

Product Information

Spherical lenses are used in a huge number of applications for collecting, focusing and diverging the light. Achromatics consist of two or three elements of different optical materials cemented together to limit the effect of spherical and chromatic aberration.

Advantages

- SCHOTT masters the entire value chain from raw glass to spherical coated lenses
- Custom designed products at competitive prices
- Coating: all lenses can be coated to a specific custom design

Materials

- All types of optical glasses
- Fused silica
- Other materials on request

Examples of Products

- Plano convex/concave
- Bi-convex/concave
- Achromatic doublets or triplets
- Meniscus lens

Manufacturing Capabilities
