

SCHOTT MIRONA® Aero

Semi-transparent mirrored glass for various interior applications

Product Characteristics

SCHOTT MIRONA® Aero, the silvery, noble-looking metamorphosis glass from SCHOTT, makes the hearts of design enthusiasts and esthetes beat faster. This solution fulfills two different functions and delivers outstanding effects. In front of a light background, SCHOTT MIRONA® Aero appears as a transparent pane of glass. In front of a dark surface, it acts as a mirror, providing a silvery, esthetic brilliance. As a result, SCHOTT MIRONA® Aero opens up unlimited fantastic design options.

Product Technology

SCHOTT MIRONA® Aero is a mineral glass that is coated on both sides with an optical interference layer to enable defined light reflection and transmission. SCHOTT MIRONA® Aero can be cleaned quite easily using a normal glass cleaning agent or a towel that has been moistened with a 1:1 mixture of methylated spirit and water.

Product Applications

Solutions available for all types of aircraft

Can be used as mirror and/or screen in lavatories

Upgrades every interior

Product Specifications/Dimensions

Available thicknesses:	2.0 mm to 12.0 mm
Max. Dimension:	1.770 mm x 1.220 mm
Weight:	depending on the thickness of the glass

Product Advantages

Homogenous appearance with regard to reflection and transmission

Low absorption losses

Reflects an elegant, silvery color

Can be thermally tempered and laminated to meet safety glass regulations

Easy to clean

Scratch resistant
