SCHOTT HelioFlex

Highly flexible fiber optic cables for spotlight applications

Product Characteristics

The SCHOTT fiber optic solution overcomes the space and heat problem by placing a light engine on a spot where there is sufficient space and heat can circulate freely. From this point, we incorporate the SCHOTT Helio Flex light guide within the panel structure and install a light outlet at the required point. The angle of the light output can be designed flexible.

The greatest advantage of such a system is the pure mechanical attributes with no electrical wiring to the panel. SCHOTT Helio Flex is compliant with FAR 25-853, ABD0031 regarding flamability, smoke and toxicity.

Product Technology

Glass fiber bundles for light transmission, which are embedded in a glass fiber braid, certified for Airbus platform including A-380.

Product Advantages

- Excellent colour characteristics and light transmission
- Electrical safety for worry-free performance
- Excellent flexibility due to a multi-fiber construction
- Unrivalled lifetime
- Factory-terminated common end for superior quality, performance and longevity
