Abu Dhabi Financial Center Car Parks

Anti-reflective facade

Glazed Car Parks at the Financial Center in Abu Dhabi

The facade of the car parks of the Abu Dhabi Financial Center is composed of 6,000 square meters of AMIRAN® Anti-Reflective Glass.

The architects for the Financial Center in Abu Dhabi desired a clear view through not only the office building but also the adjoining car parks. The outfitting of the office complex with anti-reflective glass was intended to maintain consistency of the design and the optical impression of the entire facade. To achieve this, high demands were placed on reflection and transmission. AMIRAN® insulating glass, consisting of thermally toughened safety glass and laminated safety glass, was the chosen solution and forms the exceptional facade of the car parks.

SCHOTT AMIRAN® is a one or both side anti-reflective coated glass for a clear view inside and out both day and night. Its non-sensitive high-tech coating reduces reflections to less than 1 % and allows up to 98 % of the light to pass through uninhibited. AMIRAN® provides clear viewing even under extreme brightness differences both in front of and behind the pane.

The air-conditioned car parks with about 5,200 parking spaces surround the office tower of the Abu Dhabi Financial Center. These are not underground car parks: All parking levels are located above ground.
