Lightline Linear Polarizer Kits

Product and Performance Characteristics

- Developed for use with 3" to 16" (227 to 406 mm) lightlines to enhance contrast on highly reflective surfaces for area and line scanning applications.
- Easily mount on SCHOTT lightlines alone or with cylindrical and apertured lenses affixed to the lightline.
- Polarizer(s) should be used with an analyzer supplied by the customer which is typically attached to the camera objective.
- Two polarizers are included in the kit; one polarizes in the horizontal axis and the other polarizes in the vertical axis.
- Most options are made-to-order or custom.
