

# SCHOTT NEXTREMA® 724-8 – opaque white

Pure white design and even light diffusion

NEXTREMA® 724-8 hides the heating element when switched off. When the heater is switched on the material evenly diffuses the visible light over the glass-ceramic surface and still an abundance of radiant heat. Invisible heaters blend seamlessly – eg. a bathroom is only one of many potential application ideas.

## Material benefits

- High transmission in the IR-B and IR-C range
- Pure white appearance and even light diffusion
- Easy to clean and highly chemical resistant surface

## Overlay of NEXTREMA® transmission with heating element emission spectra

### Transmission [%]

### NEXTREMA® transmission curves

- NEXTREMA® 724-8  
Thickness: approx. 2 mm
- NEXTREMA® 724-8  
Thickness: approx. 3 mm
- NEXTREMA® 724-8  
Thickness: approx. 4 mm

\*Transmission graphs are based on data from individual measurements. Deviations may result from manufacturing process.
